## SUMMARY

---

I am an experienced frontend engineer specialized in React and Next.js with a proven ability to develop responsive web applications. I possess strong skills in UI/UX design, Typescript, JavaScript programming, and code optimization, and am well-versed in agile methodologies. I am committed to staying current with the latest technologies, creating clean, efficient code, and delivering projects on time and within budget. I am a driven and detail-oriented professional who is passionate about contributing to the success of my clients

## EXPERIENCE

---

### Associate Software Engineer, Coditas Solutions

Jul 2022 - Present

- Developed and maintained several responsive web applications using React and Next.js
- Worked closely with UX/UI designers to ensure smooth user experiences and efficient workflows
- Built reusable UI components using React, Redux, Recoil and other modern frontend libraries and frameworks
- Optimized website performance and loading times through efficient code and optimization techniques
- Collaborated with cross-functional teams to implement new features and functionality
- Created unit and integration tests using Jest to ensure high code quality and reduce bugs
- Followed agile development methodologies, including daily stand-up meetings, sprint planning, and retrospective meetings
- Implemented version control using Git and Github, Gitlab to manage codebase changes and facilitate collaboration
- Stayed up-to-date with the latest frontend technologies and trends, and proactively shared knowledge with colleagues
- Contributed to code reviews, offering feedback and suggestions for improvement to ensure optimal code quality and performance.
- Also experienced in using Tailwind Css and Modular Scss with Mui and ChakraUI like Component Libraries for fast and efficient development.

## PROJECTS

---

### Hydrfacial Privacy Policy App

- Developed privacy policy section with notice page and form page using React and Next.js.
- Designed and implemented a user-friendly and dynamic notice page that explained the privacy policy and terms of service in clear language.
- Created a dynamic form page that allowed users to submit requests related to their personal data, such as access, deletion, and correction requests.
- Also implemented localisation and translated the app in 8 different languages.
- Implemented validation checks to ensure the accuracy and completeness of user submissions and client-side form validation to prevent invalid data from being submitted.
- Helped ensure the app was fully compliant with relevant laws and provided a seamless user experience for customers.

### Coditas Clap

- Developed an internal rewards and recognition platform using React and Next.js.
- Created a user-friendly interface for employees to nominate their colleagues for outstanding work, and managers to approve or reject the nominations.
- Designed a dynamic interface that displayed information about past nominations and the current status of ongoing nominations.
- Incorporated gamification features to encourage participation, such as badges and leaderboards.
- Worked closely with back-end developers to ensure seamless integration between the front-end and back-end systems.

## EDUCATION

---

### Bachelor Of Engineering, Computer Engineering

Snjb's KBJ College Of Engineering, Chandwad

Aug 2018 - Jun 2022

Grade: 9.14

## SKILLS

---

**Code Environments:** VSCode

**Libraries:** React, MUI, ChakraUi, React-Hook-Form, Formik, Yup, Axios, React-Bootstrap, Styled Components, Redux, Recoil

**Frameworks:** NextJS, TailwindCss, SCSS

**Programming Languages:** JavaScript, TypeScript, HTML, Python, C++, Basics Of Java

**Backend Services:** Strapi, Firebase, RestApi's
